Assumptions

- Radius is already available and configured.
- IT Person is available at time of install.
- The following information to be provided 48 hours before install.
 - Public IP address of the Accode server.
 - Your chosen username and password, this will be used on the install, please make a note of these details.
- The following ports require opening through your Firewall.
- Dependant on your setup the 1st point of authentication should have Ports 1812/13 inbound pointing to it, if this isn't the Accode Pc/Server then forward on the request to Accode Pc/Server.
- Port 443 inbound/outbound to the Accode ARPS server which is 'secure.accode.co.uk' / 217.64.235.241
